Mr. Lee Peha, Safety Manager
City of Seattle
Lighting Department
1015 3rd
Seattle, WA 98104

Dear Mr. Peha:

Enclosed you will find the pertinent portions of the March, 1979 EPA report (EPA-600/4-79-022) we discussed by telephone. In part, the report covers some sources of PCB's in indoor air, including the release of PCB's from fluorescent light ballast burn out.

If you wish a complete copy of the report, contact me and I will order one from the National Technical Information Service, Springfield, Virginia 22161. Please note that the table of contents is included in the copied material in order that a determination can be made regarding obtaining a complete copy.

If you have any further questions, I can be reached at (206)442-5560.

Sincerely,

Charles W. Rice
